WHAT MAKES MARITIMO OCEANS APART?

When you consider that Australia is the world's largest island, it comes as no surprise it's home to the world's finest long-range cruising motoryachts.

After all, with a coastline measuring almost 32,000 nautical miles in length, and facing the Indian, Southern and Pacific oceans', it's the perfect place to test the skills of a boat builder.

For Australia's Bill Barry-Cotter, that test has continued for 40 years, making him Australia's most awarded boat builder in the process. And this lifelong passion has culminated in the launch of Maritimo, a collection of luxury motoryachts without peer.

In fact, nothing on water looks, feels or performs quite like the Maritimo. It simply manages to be both timeless and ahead of its time. It truly is oceans apart.

WHERE BOAT BUILDING
IS MORE THAN A SKILL.
IT'S AN OBSESSION.

At first glance, challenging for the World Offshore Powerboat Championship may seem at odds with the concept of luxury cruising. However, the performance required at the pinnacle of powerboat racing has led to a number of technological breakthroughs at Maritimo. In fact, more efficient hull shapes, superior propeller and shaft technology, enhanced electrical and steering systems and safer fuel tankage are just some of the advancements transferred from race boat to pleasure craft. Which provides even further proof of why Maritimo is oceans part.

ON TOP OF THE WORLD.

If you can picture the azure waters lapping at the sun-drenched beaches of the Greek Islands, then you'll understand the inspiration behind the A60 Aegean Flybridge. Named after the Aegean Sea, it has all the style and luxury you would find in the glamorous European ports along the Mediterranean, and its beautifully styled open flybridge can actually heighten the enjoyment of paradise. Whether cruising at the helm or anchored at a favourite hideaway, the elevated position offers uninhibited views and the perfect place to laze under the sun.

THE HEIGHT OF INNOVATION.

If you can avert your gaze from the A60's exotic looks for a moment, you'll begin to appreciate a host of Maritimo trademark features. The safe, walk-around decks promise carefree long-range cruising, an enclosed barbecue, sink and bar fridge offer an al fresco alternative to the gourmet galley and, the pièce de résistance – a concealed hydraulic garage large enough to house a 3.5 metre tender. At the touch of a button, the cockpit sole raises and the transom drops allowing your tender to easily slide in and out of the garage without the need of unsightly cranes or winches.

THE INTERIOR HELM, ANOTHER HIGH POINT.

While guests naturally gravitate to the exhilarating flight deck, the lower helm station offers a sanctuary from the elements. However, there's no compromise on the view from the leather upholstered helm seats. In fact, visibility is 360°, making driving and docking easy, and safe. What's more, easy access to the walk-around decks is provided with a sliding door at the helm. And because the A60's lower helm is subtly integrated into the living space, you're never far from the party – even when cruising.

THE PINNACLE OF LUXURY.

Few motoryachts flow as seamlessly as the A60 from outdoors to in. The triple sliding doors open effortlessly to combine the cockpit, galley and saloon on one level and provide an incredibly spacious, climate controlled living environment – not to mention every modern convenience imaginable. Beyond the lower helm, carpeted steps lead below to four cabins, including the amazing full beam master with ensuite, walk-in wardrobe, it's own entertainment system and wall mounted plasma. If ever a motoryacht was designed for living the high life on the high seas, it's this one!

PERFORMANCE AND ECONOMY,
ABOVE ALL.

As majestic as it appears at the dock, it's only when you unleash the A60 at sea that you appreciate how much a motoryacht's 'ride' can contribute to the pleasure of cruising. Designed with an advanced variable deadrise hull, engines and fuel tanks over the centre of buoyancy, and a propeller shaft angle of just 9 degrees, the A60 has effortless poise and balance – and uses less fuel as a result.

HIGHLY REGARDED DOWN BELOW.

As you would expect, the engine room aboard the A60 is finished to the same exacting standard as the rest of the motoryacht. Acknowledged as one of the roomiest on any boat, you can practically walk around the big twin diesels and appreciate what are arguably the cleanest, neatest and best-protected engineering and electrical systems available. Another differentiating feature is three battery banks, one for each engine and one for the house. And the fuel tank sight gauges are a reminder that 6,500 litres provides a very long range. In fact, combined with Maritimo's legendary economy, you'll be cruising long after others have gone ashore to refuel.

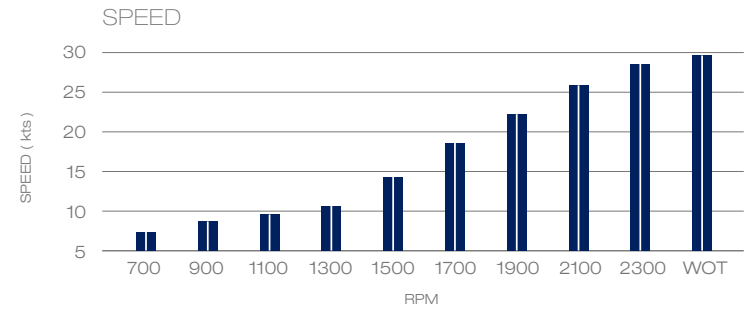

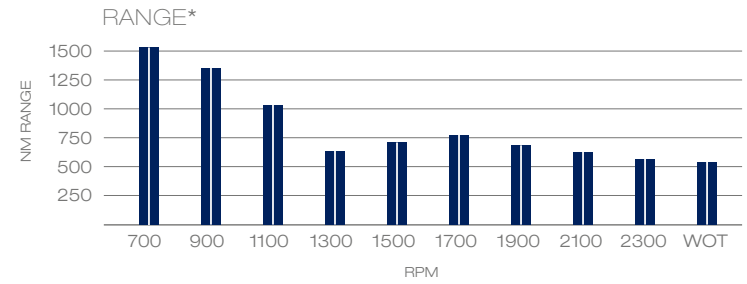

LOA	18.8 M	61'8"
BEAM	5.2 M	17'1"
